Statement on California Proposition 65

Dear Madam or Sir,

the Safe Drinking Water and Toxic Act of 1986 is managed by the California Office of Environmental Health and Hazard Assessment (OEHHA). This regulation is aimed to protect California's drinking water and its citizen from toxic chemicals that are known to cause cancer, birth defects and/or reproductive harm. OEHHA publishes and updates a list of these toxic chemicals. Since 1987 this list has grown to more than 1,000 chemicals, such as solvents, drugs, pesticides and plasticizers.

Based on a risk-based approach we have identified that the following chemicals listed in the California Proposition 65 might be present in some components of our products.

⚠WARNING External parts of our products can expose you to chemicals including Lead and Lead Compounds as well as Nickel and Nickel Compounds that are known to the State of California to cause cancer.

See www.P65Warnings.ca.gov.

Please note that that there are safe harbor levels for both chemicals.

For further questions, please do not hesitate to contact us at sustainability@euchner.de.

Kind regards,

EUCHNER GmbH + Co. KG
