Statement on TSCA

Dear Madam or Sir,

the Toxic Substances Act (TSCA) of 1976 to regulate chemicals produced and consumed in the U.S. serves to protect people and the environment. Current regulation in the Frank R. Lautenberg Chemical Safety for the 21st Century Act of 2016 expands the authority of the monitoring agency, EPA, and requires the agency to prioritize existing chemicals for risk evaluation.

TSCA is often associated with the European REACH Regulation 1907/2006. Although there are some similarities, we have to state here that TSCA is not the same as REACH.

According to the amendment effective of 2016, the following persistent, bioaccumulative and toxic chemicals (PBT) are specified in section 6(h):

- Decabromodiphenyl ether (DecaBDE) (CASRN 1163-19-5)
- Phenol, isopropylated phosphate (3:1) (PIP (3:1)) (CASRN 68937-41-7)
- 2,4,6-Tris(tert-butyl)phenol (2,4,6-TTBP) (CASRN 732-26-3)
- Hexachlorobutadiene (HCBd) (CASRN 87-68-3)
- Pentachlorothiophenol (PCTP) (CASRN 133-49-3)

Based on a risk-based approach, we have examined our components concerning the substances specified and can inform you that, in all probability, they are not part of our products.

For further questions, please do not hesitate to contact us at sustainability@euchner.de.

Kind regards,

EUCHNER GmbH + Co. KG
