## Statement on SCIP database

Dear Madam or Sir,

Companies supplying articles containing substances of very high concern (SVHCs) on the REACH Candidate List in a concentration above 0.1% weight by weight (w/w) on the EU market have to submit information on these articles to the European Chemicals Agency ECHA, as from 5 January 2021. This affects suppliers of articles, i.e. producers or importers of articles, distributors or other actors in the supply chain who place articles on the market.

At the European level, this is based on Article 33 (1) of REACH Regulation 1907/2006, according to which information available to suppliers of articles must be passed on to their direct commercial/industrial customers. This information includes SVHC that are contained at more than 0.1% weight by weight. According to Art. 9 of the Waste Framework Directive 2008/98/EC including amendment 2018/851, companies are now required to additionally submit this information to ECHA. This information is collected in the SCIP database ("Substances of Concern in articles as such or in complex objects (Products)") and made available to the market. When submitting data to the SCIP database, detailed information on articles and their contents is provided, some of which exceeds the requirements of Art. 33 (1) of REACH Regulation 1907/2006.

The "SCIP Reference Number" enables the linking of supplier and product data within the SCIP database. The products registered by EUCHNER including the associated "SCIP Reference Number" can be found in the annex. Please note that the registered data are subject to changes and adjustments.

If you have any further questions, please contact us at sustainability@euchner.de.

Kind regards,

EUCHNER GmbH + Co. KG

## Annex - Cross reference list
